Crownline 1 Year Warranty

Powder Coated Tough

Quality

Dependable

Affordable

Richard Crow wanted to manufacture a better truck bed based on customer input, modern manufacturing process and quality workmanship. Today, Crownline offers a full line of flat and hay beds. Crownline also released the first auto chute feeder with an actuator.

Richard's desire to build a full service shelter manufacturing business based on quality workmanship led to an expansion in 2016 to his factory. With the state of the art laser, and two press brakes: Crownline was created. In 2018 and 2019 We added and expanded our Powder Coating department to all of our products. In 2020 we added three robotic weld cells and a CNC machine department. In 2021 We added a second laser.

"With a strong dealer market, looking for quality products, great customer service, and cost effective prices, our business has grown beyond our expectations." says Richard Crow. "We will continue to provide for this expanding market with the same quality products and customer service we always have."
